

- With the app, you can use your mobile phone (iOS or Android) to monitor your home any time, anywhere.
- Make sure your mobile phone is connected to Wi-Fi (the same router your NVR is connected); otherwise, the app cannot discover your NVR.

STEP 1 DOWNLOAD THE APP

1. You will find a QR code sticker on your NVR. Take your mobile phone over to the NVR and scan the QR code. It automatically goes to an app store. Follow on-screen instructions to download and install the app. Sometimes a scan gets you a string of codes. In this case, please contact your local dealer for the app.
2. When the app is installed on your mobile phone, run it.

STEP 2 SET UP YOUR APP

3. Tap **Sign Up** and follow instructions to sign up for a cloud account. With a cloud account you can add your devices to cloud and view live video away from home.
4. When sign-up is complete, a message appears, indicating new devices are discovered. (Picture 1)
5. Tap **Add**. The discovered devices are listed. (Picture 2)
6. Select all and then tap **Add**. A message appears, asking whether to add devices to cloud.
7. Tap **Yes**.
8. If your country/region uses Daylight Saving Time (DST), please turn on DST, complete the settings properly, and then tap **Save** (top right). (Picture 3)
9. Now the basic setup is completed. To start live video, return to the device list, select the device, and then tap **Start Live View**.

7

- The wizard will guide you through the basic setup.

WIZARD

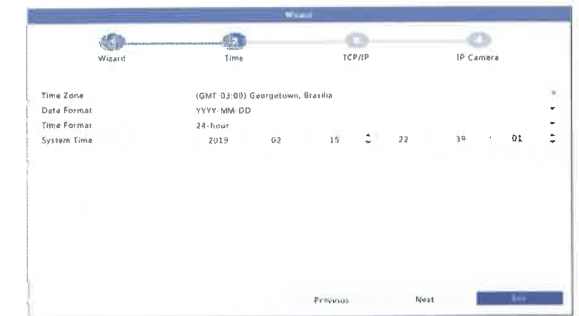

- Select the check box if you need the wizard at the next startup of the system. You may change this setting at System > Basic later.

8

TIME

- Choose your time zone. Set desired date/time formats and set the time for your system.

- ⚠ Please set properly System>Time>Time. If you country/region use it. Incorrect date/time settings can cause incorrect recording.

9

TCP/IP

- Complete network configuration, and then click Next.

IP CAMERA

- Select the devices to add in the discovered device list, click Add, and then click Yes to complete configuration.
- If you have added PoE cameras, skip this step.

11

PLAYBACK

- Right-click and choose **Playback** from the shortcut menu.
- 1. Normal is the default playback mode.
- 2. Select camera(s) on the right. You may play multiple cameras at the same time.
- 3. Double-click a date to start playback; or select a date and then click **▶**.

LOG IN WITH A WEB BROWSER

Log in to a device from a connected PC using a Web browser.

1. Open the Web browser, enter the device's IP address, press Enter. For first time use you may need to install the plugin as prompted. Close all web browsers when installation starts.
2. After installation is completed, enter the username and password to log in.
